## ALKALINE

### Alkaline 24 Power Pack

*How many times has a blister card been opened for you to then not know what to do with the remaining cells in the pack?*

Maxell Europe is pleased to announce the introduction of an innovative new style of packaging for Alkaline battery. The individual cells are packaged in a convenient and strong plastic case. Maxell Power Pack can store batteries ready for use and can be re-filled easily. Furthermore the dealer can display the 24 pack either on a Euro hook (the box is a similar size to 4pc blister card) or can be displayed in a dump bin or even on a shelf.
